# Serie BIO

Dotati di un'unica tramoggia di carico, la triturazione di potature fresche avviene per mezzo di due lame ed una controlama che eseguono il primo taglio e 6 martelli mobili che riducono ulteriormente il prodotto in schegge. Il materiale di risulta può essere utilizzato per compostaggio, pacciamatura o, se opportunamente essiccato, in caldaie a cippato. Avvalendosi di ruote e maniglia di spostamento risulta di facile utilizzo per gli hobbisti che hanno un occhio particolare alla manutenzione dei propri giardini. Costruite interamente in acciaio di buoni spessori e seguendo scrupolosamente le normative comunitarie in materia di sicurezza, i Cippatori F.B.C. risultano affidabili e semplici nel loro utilizzo anche per gli utilizzatori più esigenti.

*The BIO line is provided with a single loading hopper. Fresh pruning is firstly shredded by two blades and a counter blade followed by 6 mobile hammers which reduce the material into chips. The resulting material may be used for composting, mulching or in wood-burning stoves fuelled with wood chips. Owing to its wheels and displacement handle, the BIO line is the best solution for garden maintenance. Due to the robust steel structure responding to the CE safety requirements, F.B.C. Chippers are reliable and meet the needs of even the most demanding users.*
